ValuePlus ERP — Product Requirement Document

Every feature built and live, section by section · 3 November 2026 · valuplus.shineinfosolutions.in

Item	Details
Business	M/S Ashoka Enterprises (Value Plus Showroom), H. No. 116, Deoria Road, Kunraghat, Gorakhpur (UP) · GSTIN 09ANHPJ7242D1Z2 · Ph 9140860604
Billing companies	Value Plus and Ashoka Enterprises (a bill is raised under one of them)
Live site	https://valuplus.shineinfosolutions.in
Test copy (staging)	https://valueplus-erp-staging.shineinfosolutions1.workers.dev (its own test database)
Android app	`valuplus.shineinfosolutions.in/downloads/valueplus.apk` (opens the live site full-screen, with phone notifications)
What it is	One system for the showroom's billing, payments, finance (EMI) sales, stock and godown, purchases, delivery, staff attendance and incentives, customer leads, GST reports and profit.

1. Users and what each one sees

Every staff member signs in with email / mobile and password. Each role has its own **panel address** (e.g. `/salesman`, `/cashier`) and lands on its own home screen. The menu shows only that role's pages.

Role	Panel	Main work
Super Admin (Owner)	`/admin`	Everything. Approves the Store Manager's changes, discounts over 10%, leaves; sees all money, profit, staff and reports.
Store Manager	`/manager`	Every page, but changes to bills, payments, stock and masters go to the Admin for approval. Approves breaks and discounts up to 10%.
Cashier	`/cashier`	Tax invoices (POS), receive payments, advances, expenses, estimates from salesmen, day-close cash audit, purchase entry.
Salesman	`/salesman`	Own dashboard, leads and follow-ups, estimates and "bills" for the cashier, stock check, GIDA warehouse orders, own incentive, Onsitego plans.
Accounts	`/accounts`	Finance ledger, payouts, GST and P&L reports, supplier ledgers, documents.

Role	Panel	Main work
HR & Payroll	`/hr`	Attendance, leave, salary, staff profiles.
Godown Incharge	`/warehouse`	Godown hub, stock flow, transfers, dispatch, challans, e-way bills, audit.
Delivery Boy	`/driver`	His assigned deliveries (OTP + 3 photos), salary and advance, profile and vehicle.
Supplier	`/supplier`	Purchase orders and debit notes (outside supplier login).

Security PIN and approvals (all roles): cancelling or deleting a bill, editing a saved payment or bill, and back-dated entries need the person's own **Security PIN + a reason**. The Admin's change is applied at once and logged; the Store Manager's change waits for the Admin (**Store Activity Approvals**, showing every field Before → After).

---

2. Dashboard (Overview)

Admin / Manager / Cashier / Accounts dashboard

- Universal date filter (Today, Yesterday, 7 days, Month, custom) that updates every widget.
- Revenue, collections, dues, expenses, profit cards; payment-mode split; category and brand stock (**Brand** → **Category** → **Products** drill-down with quantity and value).
- **Profit & Loss** summary card and the **Audit** button (Mobile phones only / All products).
- **Lead Pipeline & Conversion** card with date filter, **Staff filter** (lead counts per salesperson), New / Follow-up / Converted tabs, quick status change, "Open Full CRM Leads".
- **Task delegation** card, **Staff leaderboard** (top 4 + View all).
- **Bills from salesmen** (waiting to be invoiced), **Cash Available** card (cash in register, cash with Admin, deposited in bank, total given by cashier by period), **Stock order requests**, **Outside the store now** (geofence).
- **Cash with the Cashier**: cash to collect since the last handover; Supplier ledger summary.
- Check-in card at the top for Manager, Cashier and Accounts.

Salesman dashboard (phone first)

- Name, full-width **Check In / Check Out**, Apply Leave, break control.
- **Today's follow-ups** with one-tap Call; tiles for sales today, revenue today, my leads, pending tasks.
- **Incentive** card (Earned / Received / To receive; tap for every bill, the Onsitego part and payouts).
- Target progress (by product units and by amount), Stock orders card, own brand vs other brands sales, quick actions (New Estimate, New Bill, New Lead, Stock, New Stock).
- Period tabs (Today / Week / Month / custom) with own invoices, estimates and deals closed.

---

3. Sales & Billing

3.1 Tax Invoices (POS)

- **Billing form:** customer by mobile (auto-fill from the customer master, or added as a new customer on save); billing company (Value Plus / Ashoka); warehouse; product search by name / VP code; serial / IMEI pick from available stock; qty, rate (GST-inclusive), discount, GST rate per line; HSN.
- **Sales Executive is compulsory.** It fills by itself from the customer's open lead or the salesman's bill.
- **Payment modes:** Cash, UPI, Card, Due (credit), Finance (Bajaj, HDB, IDFC, TVS, Kotak … with down payment, DO details, DO / approval attachment upload) and **Split** payment.
- **Advance and credit:** the customer's advance booking receipts and money already received through Receive Payment are shown ("Payment Already Received"), with a tick box to use them on this bill.
- **Extended warranty per line:** OneAssist, **Onsitego**, Zopper and others; plan, years, amount, policy number. **Onsitego plans are shown automatically for each product**, grouped (EW / ADLD / AMC / LTC), with price and VP Code, according to the product type and price slab; one tap adds the plan.
- **Price control:**
  - a line 1% or more below the selling price needs **discount approval** (1–10% Store Manager, over 10% Admin), and the counter waits with a live popup;
  - a price below the product's **floor / locked minimum price** needs a PIN.
- **Delivery:** counter handover or later delivery; expected delivery date; **Driver / Vehicle** drop-down (fills the driver's name, phone and vehicle); vehicle number compulsory for **Bajaj Finance** bills; delivery challan made automatically.
- **Bill date is always today** (no back-dating); offline bills keep their own date when they sync.
- **On save:** stock goes down per warehouse, serials become SOLD, customer balance and khata update, leads convert, sales-target tasks move, the finance DO is created, the salesman's incentive is recorded (+10% of Onsitego plans).
- **Print / share:** GST tax invoice (A4), WhatsApp share; delivery photos viewable on the bill.
- **Invoice list:** search, date filter, Paid / Balance (advance shown), "Delivered" badge, delivery photos, export to Excel / PDF; phone card view.
- **Edit a saved bill (full edit):** same form, Security PIN + reason; stock, serials, balance, receipt, warranty, challan and finance DO are redone. The Manager's edit waits for the Admin, who sees every change.
- **Cancel / delete** with PIN + reason; deleted bills are archived (who, when, why).
- **GSTIN bills keep real GST.** An Admin-only tool fixes old 0% GSTIN bills.

3.2 Receive Payment (Counter)

- Type-to-search customer, or **add a new customer right there** (name, mobile, address, GSTIN, credit limit …).
- Receive (In) or Refund (Out); amount, date, mode, reference / UTR.
- **Reason is compulsory** for customer payments.
- After saving, a **payment receipt** opens: receipt no., customer, reason, mode, received by, amount in words, and **"Advance with us ₹X — will be taken off the next bill"** / still due / settled. It can be

printed or sent on WhatsApp. Every past payment has a **Receipt** button.

- Money received without a bill becomes the customer's credit, used on the next bill (and given back if that bill is deleted).
- Editing or deleting a payment needs PIN + reason (Manager → Admin approval). Supplier payouts are on the same screen.

3.3 Customer Advances (Advance Booking / Token)

- Customer, mobile, amount, mode, ref, product booked, brand, **reason (compulsory)**, remarks.
- Receipt `ADV-YYYY-####` with reason and received by, in India time; **print (receipt only)** and WhatsApp.
- Status: Available → Partially Used → Fully Adjusted / Refunded; refund with notes.
- The bill form finds the advance by mobile and deducts it.

3.4 Estimates / Quotes and salesman "Bills"

- **Estimate** = quotation for the customer (print / WhatsApp), no approval needed.
- **Bill (salesman):** a sale the salesman makes when the customer is buying now. It goes to the Cashier / Manager / Admin with a **popup and phone notification**; the cashier presses **Make Invoice**, confirms payment and delivery, and the invoice is made under the salesman's name. The salesman is told when it is invoiced or rejected.
- **Deal amount** recorded for the salesman; **locked minimum price** per product; below it needs the Admin's **Price Unlock PIN** (a salesman can never go below it).
- Advance can be taken on an estimate (makes an advance receipt).

3.5 Other sales pages

- **Credit Notes:** sales returns and adjustments.
- **Sales Orders:** customer orders.
- **GIDA WAREHOUSE ORDER:**
  - Admin / Manager / Cashier upload the supplier warehouse's daily stock sheet; products show NEW and +N markers;
  - salesmen pick quantities and send an order request (`SO-YYYY-####`);
  - the Admin approves or rejects it and sends the products list on WhatsApp to the supplier;
  - only today's sheet is used.
- **Order Dispatch & Deliveries:** bills waiting for delivery, out for delivery, delivered, with OTP and photos.
- **Delivery Challan:** tabs Delivery Challans / Pending Delivery / Delivered; return and transfer challans.
- **E-Way Bills:** prepare e-way bill details for consignments over ₹50,000.
- **Finance DO** page.

---

4. Purchase & Expenses

- **Purchase Entry (GRN / supplier bills):**
  - manual entry, or **import from the supplier's PDF / Excel invoice** (products matched by VP code / model, serials read from the PDF, supplier details read from the letterhead);
  - warehouse, GST, payment made at entry, due date;
  - stock and the supplier balance go up; serial numbers saved.
- **Add Serial Numbers** later (paste a list; replace if wrong); the Admin can correct a line rate.
- **Purchase bill correction** (date, due date, GSTIN) with PIN + reason; cancel / delete with PIN (Manager → Admin approval); record a bill payment.
- **Purchase Orders** to suppliers (the supplier login can see them); **Debit Notes & Return Claims**.
- **Low Stock / Auto Reorder:** items below their reorder level.
- **Expenses (Petty Cash):** expense heads, GST, mode, analytics; counted in the cash register and P&L.

---

5. Products & Masters

- **Items (Master Stock):**
  - VP code, model, brand, category, HSN, GST, purchase price, selling price, MRP, **VSP**, floor price, incentive setting (fixed ₹ or % above a target price);
  - stock per warehouse (showroom / godown);
  - Product Ledger (every purchase and sale with profit; invoice links);
  - price-sheet (V+NLC / VSP) upload by brand with a sample sheet; bulk incentive; assign brands; GST and purchase-GST fix tools (Admin);
  - phone view: compact list with role-based detail.
- **Stock Report (Price & VSP):** brand, product type, stock filter, search; stock value at selling price and VSP; export.
- **Categories, Brands** (brand → product catalog with "Bill Now"), **Units, Warehouses & Godowns, Customers** (GSTIN, credit limit, balance / khata, ledger), **Suppliers**.

---

6. Finance & EMI Hub

- **Customer Dues & Overdue:** pending dues and EMIs, WhatsApp reminders, collect payment.
- **Monthly EMI Cycles:** repayment schedules, due dates, progress, counter / auto-debit payments.
- **Finance Ledger & Delivery Orders:**
  - finance company, DO / DA numbers, down payment, disbursement;
  - the uploaded **DO attachment (PDF / image) opens** through the app.

- **Bank NACH & Payouts:** finance payouts, bank account and UTR entry; reminders until the UTR is filled in.

---

7. Suppliers & Ledgers

- **Supplier Master** and supplier profile.
- **All Ledgers:** every supplier's purchases, payments and balance, with statements to print / export.
- **Supplier Payments.**
- **Outstanding & Ageing:** what is owed and for how long.

---

8. Godown & Logistics Hub

- **Godown Master Hub:** inward (GRN), serial tracking, transfers, dispatch, audits in one place, with check-in for godown staff.
- **Stock Flow (In / Out):** every stock movement by date.
- **Stock Transfer:** inter-godown / showroom transfers (in transit → received). The Manager's transfer waits for the Admin.
- **Live Audit (daily):**
  - count every product (or phones only: **Mobile Audit**); several people count at the same time, each count saved live with who counted;
  - finalise only when all are counted; history with differences, export;
  - click a product for its full history;
  - Admin decides who may audit.
- **Dispatch, Delivery Challan, E-Way Bills** (as in section 3).

---

9. Delivery Boy Portal

- **My Assigned Deliveries:** expected date (overdue / today), customer and address; **Out for delivery** → **OTP from the customer** → **Delivered** with **3 compulsory photos from the in-app camera** (no gallery); the photos are viewable by the Admin / Manager.
- **My Salary & Advances**, **My Profile & Vehicle**.

---

10. CRM & Customer Service

- **Sales Leads:**

    - customer, mobile, product(s), value, source, assigned salesman (a salesman's own leads only), status;
    - follow-ups with notes and next date; **every Call press recorded** (who / when) and shown per day; history cannot be edited;
    - WhatsApp; leads pop-up at sign-in; phone cards view;
    - **Staff filter**; Admin **Staff Activity** (calls and follow-ups per salesman per day);
    - a lead converts automatically when the customer is billed.
- **Customer Queries (walk-in enquiries)** and **Customer Complaints** (tickets: product issues, transit damage, staff conduct).
- **On Site Go (Plans):** the Onsitego folder for every staff member (see section 13).
- **WhatsApp notifications** outbox page (customer messages and their status).

---

11. Staff & Attendance

- **Check-in / Check-out:**
    - only **inside the store (within 100 m)**, with a **selfie** and location;
    - shift 10:00 AM – 9:00 PM; late minutes recorded; Late / Half-Day rules;
    - **automatic check-out at 9:00 PM**;
    - "Office time has started" notification at 10:00.
    - Late alerts to the Manager and Admin: one per person, every 15 minutes, 10:00–12:00.
- **Geofence (time outside the store):** while the staff app is open it records when the person leaves (over 150 m) and comes back, how long and how far. Breaks are counted separately, and app-closed time is shown as "unknown". **After 15 minutes outside, the Manager and Admin are alerted.**
    - Shown on: the dashboard "Outside the store now", Staff Directory "Away today", the staff member page, and the attendance page.
- **Daily Attendance & Shifts:** day / staff / date filter, selfie view, manual entry, shift settings.
- **Leave & Breaks:**
    - Weekly Off, Leave, Emergency Leave, Break;
    - approval popup for the Admin / Manager;
    - approved history with period filter;
    - break timer with "I am back" (checked inside the store) and a break-over alert.
- **Staff Tasks Delegation:**
    - general tasks and **sales targets** (by product / brand units and / or by amount, with progress bars that move automatically on every bill);
    - **one task to several people at once** (each gets their own copy);
    - "Read by", priority, due date, notifications.
- **Staff Directory (Admin / Manager):** each person's bills, **incentive earned / paid / to pay**, payouts, away today; the member page shows attendance, time off, away time and sales by month.

- **Staff Leaderboard:** ranking by sales, bills, units, collected, average bill and share.
- **Sales Incentives:** per-bill incentive ledger; **10% of every Onsitego plan sold** is added automatically to the bill's salesman.
- **Salary & Payroll:** monthly salary, incentives, deductions, payment.
- **Staff filter** on Tasks, Leave & Breaks, Leaderboard, Salary and Directory.
- **My Profile & KYC.**

---

12. GST & Financial Reports

- **Profit & Loss:**
  - opens on Today; sales and purchases GST included; product-wise profit using the cost frozen on each bill line;
  - "GST this period (not part of profit)" box;
  - expenses; A4 print.
- **GST Reports:** GSTR-1 (B2B / B2C), GSTR-2, GSTR-3B, HSN tab; Excel export.
- **HSN Summary Report** (GSTR-1 Table 12): B2B and B2C, by HSN + rate, drill-down to bills, 2-sheet Excel in portal format.
- **Sales Out Report:** sales register with dues, payment modes, finance status.
- **All Reports & Analytics**, **Documents**.

---

13. Documents and On Site Go

- **Documents:**
  - office documents (PDF / photos) with date and narration, in **folders** (Admin / Manager create; the Admin deletes empty folders);
  - files open only through the app (private storage).
- **On Site Go folder (always present):**
  - the Admin / Manager upload Onsitego material;
  - **every staff role can open it**;
  - **uploading Onsitego's price list PDF reads all plans** (e.g. 153 plans: SKU name, VP Code, price slab, price) and replaces the old list; the bill then shows these plans per product;
  - a newer PDF replaces the plans automatically.

---

14. Store Profile & Settings

- **Store Activity Approvals:** every change waiting for the Admin, with Before → After and Approve / Reject (phone card view).

- **Users & Staff KYC Master:** logins, roles, KYC, salary, advance, brand (vehicle number for delivery staff).
- **Role Permissions:** who can open ledgers, record payments, cancel / delete.
- **Security PIN** (each person's own), **Price Locks**, **Price Unlock PIN**.
- **Company / Store Profile:** GSTIN, address, bank accounts on invoices.
- **Bank Accounts Master & Cash Register:**
  - showroom cash register with daily in / out;
  - **Daily Cash Audit (day-close)** with notes count; Sales and Cash pages lock until the previous day is closed;
  - Admin "Set actual cash" and "Recalculate old audits".
- **Admin Cash Book:** cash received from the cashier (handover confirmed by the Admin), deposits, cash with the Admin.
- **System Settings.**

---

15. Across the whole app

- **Live updates:** every screen refreshes the moment its data changes anywhere (WebSocket), with no repeated polling: lighter and faster.
- **Notifications:** bell + **phone push notifications even when the app is closed** (approvals, tasks, bills from salesmen, leaves, discounts, late / away alerts), with sound; unread popup once per device; one popup at a time.
- **Phone-first design:** bottom bar, Menu as tiles, card layouts for tables, 44 px buttons, Android app (APK).
- **Offline billing:** bills can be made without internet and sync later.
- **Exports:** Excel / PDF on most lists; WhatsApp sharing for bills, receipts, reminders.
- **Audit trail:** cancels, deletes, edits, payment changes, price locks and more are logged with who and why.
- **External portals:** Value Plus Retail customer portal (embedded) and Gmail.

---

16. Built pages not in the menu (kept hidden)

These pages exist and can be switched on later:

- Journal Entries, General Ledger, Trial Balance, Balance Sheet, Cash Flow;
- Bank Receipts / Payments;
- Loyalty Program;
- Variants, Bill of Material;
- Stock Adjustment, Stock Journal, Stock Request, Stock Return.

---

17. Technology and hosting

- **Next.js 15 + React 19 + TypeScript**, Tailwind / shadcn UI; **MongoDB Atlas** (Mumbai) database.
- Hosted on **Cloudflare Workers** (custom domain), with a separate staging copy and database.
- Files: Cloudinary (documents, DO attachments) and Cloudflare R2 (delivery photos, selfies).
- Live updates: Cloudflare Durable Object (WebSocket hub).
- A background job runs every 5 minutes (late, break and away alerts, auto check-out).

---

18. Known issues and next steps

A full code review on 3 November 2026 listed the open bugs in **BUGS.md** and the improvement ideas for each user in **SUGGESTIONS.md**. The most important:

1. **Security:** remove the master passwords at login; only the Admin may create users or change passwords; take the database password out of the code; hide the delivery OTP from the tracking page and the delivery screen; role checks on salary / stock / money APIs.
2. **Money:** - Receive Payment must not switch to "Refund" by itself; - a partly used advance must show on the next bill; - cancelling a bill must return its advance and free its serial numbers; - a salesman's bill must not be invoiced twice.
3. **Reports:** leave cancelled bills out of the dashboard, Sales-out and GST reports, and subtract credit notes.
4. **Staff:** a salary advance request needs approval; check-in for godown staff at the godown; sales targets matched by the person, not the first name.
